

Rutherford County Employee Flu Shot Clinic

The Centers for Disease Control and Prevention (CDC) recommends a yearly flu vaccination as the first and most important step in protecting against the flu and its potentially serious complications. Flu vaccinations can reduce flu illnesses, doctors' visits, missed work and school, as well as prevent flu-related hospitalizations and deaths. The flu vaccination can keep you from getting sick from the flu. Protecting yourself from the flu also protects the people around you who are more vulnerable to serious flu illness.
